International University "MITSO"
2014 - 2018

Faculty of Law - International Law

Certificates

2021

About

Work preferences

Graduated from the University in 2018, Faculty of Law (International Law) with a specialization of International Commercial Law. The years during the university were interesting and rich - I received a good store of knowledge. After university, I tried myself in many areas - there were as i said before ups and downs. A great desire to develop, earn, and improve myself.

I have extensive experience in sales and speak English.

At the moment, for a year already, i ve been seriously passionate about IT technologies in the field of front-end web development and everything related to this industry - I would also like to join this environment to gain experience even as an intern. I already have confident knowledge of CSS SCSS Sass HTML (responsive layout) + Javascript Jquery base. I know a little PHP, I can work with git
I also understand the development of a website on Wordpress
I am full of desire to learn and achieve heights in this direction.
